

# Material testing Division

<b>Sr. no.</b>	<b>Name of ongoing Research problem</b>
1	Ferrocement technique in construction by using guniting and other meachnical work
2	Study of leakage proofing material available in market to avoid leaching through dam in maharashtra
3	Compatibilty of chemical admixture with cement (part 2)
4	Use of steel fibre in concrete
5	Study of use of glass powder in concrete
6	Use of slag sand in concrete

## New research problem

<b>Sr. no.</b>	<b>Name of Research problem</b>
1	To study the durability test of PPC & OPC cement
2	Development of all types of testing facilities for the various types of pipes
3	To study the Geosynthetic material in construction & developing the testing facilities for the same
4	Study to calculate the quantity of cement in leaching material through various dams
