

Ongoing Research Work :

1. Comparison of plate bearing test between Dry and Wet Condition.
2. Landslide in India slope protection and remedial measures.
3. Determination of thickness of CNS layer according to swelling pressure of B.C.soil.
4. Determination of Water Content and Dry Density relation using compaction.
5. Study regarding improvement of Bearing Capacity of soil by various Methods.
6. Report on the foundation & investigation of soil properties SulwadeJamphalKanoli project, ShindkhedaDist- Dhule
7. To derive Talukawise/Districtwise soil properties pattern for Maharashtra State.
